Description of the accident (claimant's words)

I was making a left turn at a green light, moving slowly through the intersection in League City, Texas, when a vehicle coming from the opposite direction struck the front driver's side of my car. I had already started into the turn and had nearly cleared the oncoming lane when the impact happened. My airbags deployed and my car spun partway around before stopping. I got out and noticed right away that my left wrist was badly swollen and hurt when I tried to move it. Emergency responders came to the scene, and I was taekn to a local hospital, where X-rays showed a fractured wrist. I have since been placed in a cast and am following up with a specialist. I believe the other driver failed to yield the right of way when the light turned, and I am providing this account so the claim can be reviewed.
