Officer's narrative

On arrival at the intersection in Pearland, Texas, I observed two passenger vehicles with visible damage consistent with a side impact. Driver 1 was traveling through the intersection on the primary roadway when the front of Driver 2's vehicle entered the travel lane and struck the driver's side of Driver 1's vehicle. A Passenger was seated in the front passenger seat of Driver 1's vehicle. Both vehicles sustained heavy damage to the affected sides, and airbags deployed in Driver 1's vehicle. Driver 2 stated they did not see the signal change before proceeding. Traffic control signals were operating normally at the time of the crash. Driver 1 reported neck strain and pain in the upper back and was evaluated at the scene by Emergency Medical Services. Driver 1 declined transport at that time. Both drivers provided insurance information and exchanged contact details. No citations were issued at the scene pending further investigation of the signal sequence.
