Description of the accident (claimant's words)

I was making a left turn at an intersection in Conroe, Texas, and had nearly completed the turn when another vehicle struck the side of my car. I had the green light and was moving slowly, so I did not expect anyone to come through the intersection at that speed. The impact pushed my car sideways and my right knee hit the dashboard and door frame. I was able to exit the vehicle on my own, but my knee was swollen and painful, and I have been having difficulty bearing weight on it since the collision. I was evaluated at the scene by emergency responders and later sought further medical care. I am providing this account so the dteails of how the accident happened are recorded accurately for my claim.
