Description of the accident (claimant's words)

I was driving north on the main road in Baytown, Texas, moving slowly through heavy traffic, when the car in front of me stopped suddenly. I braked, but the vehicle coming toward me in the opposite lane swerved into my path, and we collided head-on at low speed. Both cars came to a stop almost immediately. Neither airbag deployed, and I was able to drive my vehicle to the shoulder. The other driver and I exchanged insurance information, and I took photographs of both vehicles and the surrounding road. Later that evening I noticed stiffness and soreness in my neck, which I believe was caused by the sudden jolt of the impact. I have been experiencing a neck strain since the accident and have arranged to see a doctor for evaluation and treatment.
