Description of the accident (claimant's words)

I was merging from the right lane onto the freeway in Katy, Texas, checking my mirror before moving left. I had just begun to change lanes when a silver sedan in the lane beside me moved over into my car. The impact pushed my vehicle toward the median and the driver's side panel was scraped along its length. I managed to steer back under control and pull onto the shoulder. My head struck the window frame during the collision, and afterward I felt dizzy, had a headache, and was sensitive to light. I was evaluated at a local emergency room and diagnosed with a concussion. I have since been told to rest and avoid screen time. I am providing this acconut so the claim can be processed promptly.
