### Description of the accident (claimant's words)

I was making a left turn at an intersection in Sugar Land, Texas, when another vehicle coming from the opposite direction struck the front driver's side of my car. I had already started into the turn and was moving slowly when the impact happened. My airbags deployed and I was jolted hard against the door and dashboard. I felt immediate pain in my right knee, which swelled over the following hour, and I had difficulty bearing weight on it. Police were called to the scene and I exchanged insurance information with the other driver. I was taken to an urgent care clinic for evaluation and was told I may have a ligament strain. I am providing this account so that my claim can be processed.
