Description of the accident (claimant's words)

I was making a left turn at an intersection in Conroe, Texas, going slowly and waiting for a gap in oncoming traffic. As I started through the turn, another vehicle coming from the opposite direction struck the front driver's side of my car. I did not see the other car until the moment of impact, and I believe it had entered the intersection at speed. My airbags deployed and my vehicle was pushed sideways into the lane, where it came to rest. I was able to get out of the car on my own and remained at the scene until the police arrived. Afterward I noticed sharp pain in my right shoulder, which has limited my ability to lift my arm and turn the steering wheel. I have since been seen by a medical provider for this shoulder injury and am continuing treatment. My car has visible damage to the front driver's side and I am requesting an inspection and repair estimate.
