Description of the accident (claimant's words)

I was making a left turn at a green light when a pickup truck coming the other way crossed into my lane and struck the front driver's side of my car. The impact spun my vehicle partway around, and I felt my head snap forward and back against the headrest. Airbags did not deploy, but I was shaken and could not satnd upright for several minutes afetr I got out. The other driver stated that they had looked for oncoming traffic but did not see me in time. Police were called to the scene and I was given a report number. Since the collision I have had stiffness and sharp pain in my neck, along with a dull ache across my lower back that gets worse when I sit for long periods. I have been seeing a doctor for teratment and have missed several days of work because of the pain.
