| **Reported injury:** | back strain |

### Description of the accident (claimant's words)

I was driving north on the main road toward the intersection when the traffic light turned yellow. I slowed down and proceeded through carefully, and I was about halfway across when a vehicle coming from the cross street entered the intersection and struck the side of my car. The impact pushed my vehicle sideways and I felt a sharp jolt through my body. My airbags did not deploy, but my seatbelt tightened hard against my chest. After the collision I stayed in the driver's seat for a few minutes because my lower back was sitff and aching. I got out slowly and spoke with the other driver, and a bystander called for help. Later that day I noticed persistent pain and muscle tightness in my lower back, which I believe was caused by the crash. I have since sought medical attention for a back strain.
