Description of the accident (claimant's words)

I was making a left turn at a green light when a pickup truck coming from the opposite direction struck the front driver's side of my car. I had already started into the intersection and was checking for oncoming traffic when the impact happened. My airbags deployed and my car spun partway around before stopping. I didn't see the other vehicle until just before it hit me, and I did not have time to brake or steer away. Shortly afterward I felt stiffness and pain in my neck and upper back, which I later learned was whiplash. I stayed at the scene until the police arrived and gave my statement. My vehicle was towed from the intersection and is currently being inspected for damage.
