Description of the accident (claimant's words)

I was making a left turn at an intersection in Pearland, Texas, and had the green light for my direction of travel. I had nearly completed the turn when a vehicle coming from the opposite direction struck the front driver's side of my car. The impact was sudden and I was thrown forward and then back against my seat. My airbags did not deploy, and my car was driven from the scene only after the other driver and I exchanged information. Since the collision I have had stiffness and pain in my neck, along with headaches when I turn my head. I was evaluated at a clinic the same day and was told I had a neck strain. I am still undergoing treatment and have limited my driving and daily activities while I recover.
