Description of the accident (claimant's words)

I was riding in the front passenger seat when the driver began changing lanes on the highway in Conroe, Texas. Traffic was moving steadily, and I did not notice the other vehicle until it made contact with the side of our car. There was a loud scraping sound, and our vehicle jerked toward the shoulder before the driver regained control. Both cars pulled over safely after the impact. I felt my head snap sideways and then forward, and by the time we stopped my neck was stiff and sore. I went to a local clinic later that day, where I was told I had a neck strain and was advised to rest and take over-the-counter pain relievers. I am still experiencing tightness and discomfort when I turn my head, and I have been limiting my activities while I recover.
