Description of the accident (claimant's words)

I was driving north on the main road and had the green light when a silver sedan came through the intersection from my right side and struck the passenger door of my car. I heard a loud bang and felt the car spin slightly before coming to rest against the curb. Airbags did not deploy, but I was thrown sideways and my neck snapped back and forth. Within an hour I started having stiff pain at the base of my skull and down into my shoulders, and I have had trouble turning my head since. I exchanged information with the other driver, who said the red light had not chnaged for them, and a police officer came to take a report at the scene. I went to urgent care that evening and was advised to rest, take medication, and follow up with a physical therapist.
