Description of the accident (claimant's words)

I was making a left turn at an intersection in Conroe, Texas, when another vehicle came through the intersection and struck the driver's side of my car. I had my turn signal on and had stopped briefly to check for oncoming traffic before proceeding. The ipmact pushed my vehicle sideways and I was jolted hard against my seatbelt. My car's door was damaged and the front wheel area was crushed. I was able to exit the vehicle on my own, but later that day I noticed significant pain and stiffness in my right shoulder, which has limited my ability to lift and reach. I went to a medical clinic for evaluation and was advised to rest the shoulder and follow up with a specialist. I am providing this account so the claim can be processed accurately.
