Description of the accident (claimant's words)

I was driving in the right lane on a busy road in Pasadena, Texas, when I signaled and began moving left to change lanes. As I moved over, a vehicle in the left lane came up beside me and its side made contact with the front-left portion of my car. I had checked my mirror before moving, but the other vehicle appeared to accelerate into the space as I merged. Both of us pulled onto the shoulder after the impact. There was scraping along the driver's side of my vehicle and a dent near the front wheel well. I did not lose control of my car, and no airbags deployed. Afterward I felt stiffness and soreness in my neck and upper back, which I attributed to the sudden jolt. I have since been evaluated and was diagnosed with a neck strain. I am providing this account so the claim can be processed accurately.
