June 2025: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$1,188.26
July 2025: massage therapy	1	$79.70

Treatment summary

Patient presented following a collision sustained while turning left, when the vehicle was struck from the side. Complaints centered on neck and low back pain with associated stiffness and muscle tightness. The mechanism of impact and the forces involved are consistent with the soft tissue injuries reported. Over the course of eleevn visits, treatmnet consisted of manual therapy, therapeutic exercise, and home stretching instruction, and followed a typical progression. Care was gradually reduced in frequency as symptoms improved and range of motion returned. On examination, paraspinal muscle tenderness and reduced cervical rotation were noted and support the reported injury. Other neurological and orthopedic screening tests were within normal limits. The patient reports no prior injury or treatment involving these same body regions. Note that two similar billing entries dated the same day are currently under review for accuracy and are not yet resolved.
