Month and services	Visits	Charges
March 2023: chiropractic adjustment, evaluation, physical therapy	3	$683.94
April 2023: chiropractic adjustment, imaging, physical therapy	5	$2,574.06
May 2023: chiropractic adjustment, massage therapy, pain management, physical therapy	5	$1,049.41

Treatment summary

Patient presented following a sideswipe collision that occurred while the patient was changing lanes, reporting right shoulder pain and restricted overhead motion. The mechanism of injury described is consistent with the reported symptoms. Over the course of thirteen visits, care consisted of physical therapy, a home exercise program, and activity modification. Treatment followed a typical progression, with visit frequency decreasing as symptoms improved and the patient was discharged to self-management. Nearly all of the documented findings are based on the patient's own descriptions of pain and limitation. Shoulder imaging was unremarkable, and orthopedic provocation tests performed during the examinations were within normal limits. The patient reports no prior injury to the shoulder. Certain billing entries for two services recorded on the same date are currently under review for accuracy and are not reflected in the clinical findings above.
