Treatment History and Summary

Patient:	Laurie Gonzales
Treating provider:	Jennifer Lee, DC
Diagnosis:	concussion

Treatment history by month

Month and services	Visits	Charges
November 2023: evaluation, imaging, massage therapy	3	$996.32
December 2023: imaging, massage therapy, pain management, physical therapy	5	$1,804.05
January 2024: chiropractic adjustment, massage therapy, pain management	5	$1,355.02
February 2024: imaging, pain management	3	$1,750.75

Treatment summary

Patient presented following a sideswipe collision that occurred while the other vehicle was changing lanes. The reported mechanism, including the direction of impact and the force involved, is consistent with the concussion diagnosed at intake, and the symptoms described at presentation align with that mechanism. Over the course of 16 visits, care followed a typical progression, beginning with symptom monitoring, vestibular and cognitive assessment, and graded activity guidance, then tapering in frequency as the patient's headaches, light sensitivity, and concentration difficulties improved. Imaging and neurological examination findings clearly support the diagnosis. The patient reports no prior injury to the head or neck region, and none appears in available records. Billing records show two similar charges submitted on the same day, which are currently under review to confirm they reflect separate, appropriate services. Current sattus is improving, with return to work planned pending final reassessment.
