Treatment history by month

Month and services	Visits	Charges
October 2023: evaluation, imaging, massage therapy	3	$1,536.64
November 2023: chiropractic adjustment, imaging, massage therapy	5	$1,393.18
December 2023: massage therapy, pain management, physical therapy	4	$743.07

Treatment summary

Patient presented following a low-speed collision in a parking lot with complaints of neck pain and stiffness. Over the course of twelve visits, care consisted of conservative management including gentle range-of-motion exercises, soft tissue therapy, and home stretching instructions. Examination revealed paraspinal muscle tenderness and reduced cervical range of motion, which are consistent with a soft tissue strain. Neurological screening, including reflexes, sensation, and strength testing in the upper extremities, returned normal results. No prior injury to the cervical region has been reported in the patient's history. Treatment followed an exepcted and typical course, with frequency of visits decreasing as symptoms improved and the patient was discharged to independent home exercise. At this time, it cannot be determined with certainty whether the reported symptoms are attributable to this collision, and further records may be needed to clarify causation. Billing records reflect single, non-duplicated charges for each service rendered.
