Officer's narrative

Driver 1 was traveling through the intersection in Katy, Texas, and was completing a left turn when the vehicle was struck on the driver's side by Driver 2, who was proceeding straight through on the cross street. Responding officers arrived and found both vehicles resting in the roadway with visible front-end damage to Driver 2's vehicle and a crushed driver-side door and quarter panel on Driver 1's vehicle, consistent with the angle and speed of the impact described at the scene. Driver 2 stated that the collision occurred as Driver 1 turned in front of them, and two independent witnesses gave statements that match that account. Photographs taken at the scene were reviewed and show damage patterns consistent with the reported sequence. No prior damage to Driver 1's vehicle was observed or reported. Driver 1 reported neck and lower back pain and was evaluated by medical personnel on scene. Driver 1 was the operator of the vehicle, and it was not fully clear from the statements where in the vehicle they were seated at the moment of impact. Driver 1 is listed as a named insured on the policy covering the vehicle. A passenger in Driver 1's vehicle was not reported as injured.
