Month and services	Visits	Charges
June 2025: evaluation, massage therapy, pain management, physical therapy	5	$1,143.43
July 2025: chiropractic adjustment, imaging, physical therapy	5	$2,274.85
August 2025: massage therapy	1	$71.37

Treatment summary

Patient presented following a rear-end motor vehicle collision with pain and swelling of the wrist. Imaging was consistent with a wrist fracture, and the reported mechanism of injury is well matched to the force of the crash. Over the course of eleven visits, care proceeded along a typical trajectory: immobilization, pain management, and progressive range-of-motion and strengthening work. Visit frequency decreased steadily as symptoms improved and function returned. On examination, localized tenderness and reduced grip strength over the fractured area are present and support the diagnosis, while neurovascular checks, sensation, and the remaining joint tests were within normal limits. The patient reports no prior inujry to this area, and no earlier records of wirst problems were identified. Billing reflects the services rendered, with no duplicate or repeated charges for the same care.
