Treatment History and Summary

Patient:	Jessica Walker
Treating provider:	Zachary Johnson, DC
Diagnosis:	knee injury

Treatment history by month

Month and services	Visits	Charges
March 2025: evaluation, pain management	2	$831.90
April 2025: imaging, massage therapy, physical therapy	3	$962.77

Treatment summary

Patient presented following a side-impact collision at an intersection with acute pain and swelling of the right knee. Over five visits, care folloewd a conventional course of rest, ice, compression, a supervised home exercise program, and anti-inflammatory medication. Examination revealed localized tenderness and a small effuison along the medial joint line, consistent with the mechanism of injury and the force described at the scene. Other ligamentous and neurovascular testing was within normal limits. Range of motion improved steadily across visits, and the frequency of treatment was reduced as symptoms resolved. The patient reports no prior injury or treatment involving this knee. Billed services correspond to the visits documented, with no duplicated or repeated charges identified. Expected full recovery with continued home exercise and as-needed follow-up.
