Officer's narrative

Driver 1 was traveling in the left lane on a multi-lane road in Conroe, Texas, when Driver 2 changed lanes from the right and struck the left side of Driver 1's vehcile along its rear qurater panel. Both drivers stopped at the roadside and exchanged information. Driver 1 reported neck pain and stiffness consistent with whiplash and said the impact jolted their head forward and back. A Passenger was also seated in Driver 1's vehicle at the time of the collision, and both the responding officer and a nearby witness confirmed that the Passenger was present. Driver 2 acknowledged changing lanes without checking the blind spot and gave an account matching Driver 1's description of how the crash occurred. Two independent witnesses and photographs taken at the scene corroborate the sequence of events. The damage visible on Driver 1's vehcile lines up with a sideswipe of this type, and the officer observed no prior damage to the vehicle's left side. Driver 1 is listed as the named driver on the insurance policy for the vehicle. Medical attention was offered at the scene and Driver 1 agered to be transported for evaluation.
