Officer's narrative

Driver 1 was traveling in the left-turn lane at an intersection in Pasadena, Texas, when the collision occurred with Driver 2, who was proceeding straight through the intersection. Driver 1 reported that the vehicle turned left and was struck on the driver side by the other vehicle. Driver 1 stated that neck pain and stiffness began shortly after the impact and that he was experiencing symptoms consistent with whiplash. The injury described is plasuible given the mechanism of this collision. Drvier 2 was present at the scene and gave a statement consistent with the physical evidence. No independent witnesses were located at the time of the investigation. Scene photographs confirm seevral details reported by both drivers, and the damage visible on both vehicles matches the impact described. The reporting officer noted that no prior damage to the vehicle was known from available records or from the drivers. Driver 1 is listed as the nmaed insured on the policy covering the vehicle. A Passenger was also in the vehicle, but it was not fully clear from statements where in the vehicle that person was seated at the moment of impact, and this detail remains unresolved in the report.
