June 2024: chiropractic adjustment, massage therapy, physical therapy	5	$569.86
July 2024: pain management, physical therapy	2	$560.58

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of right shoulder pain and restricted range of motion. Over the course of nineteen visits, care consisted of physical therapy, a home exercise program, and anti-inflammatory medication. The reported injury is consistent with the mechanism of a rear-end impact of this type. Treatment followed a typical progression, with visit frequency decreasing as symptoms improved and range of motion returned toward functional levels. Examination findings include limited elevation and tenderness along the rotator cuff, which support the reported injury, while neurological screening and strength testing were within normal limits. No prior injury or treatment to the right shoulder is known. Billing records reflect a single charge for each service rendered, with no duplicate or repeated entries.
