Patient:	Heather Nelson
Treating provider:	Charles Hensley, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
April 2025: evaluation, pain management, physical therapy	3	$1,113.32
May 2025: chiropractic adjustment, pain management, physical therapy	3	$986.43
June 2025: chiropractic adjustment, imaging, pain management	4	$1,672.96
July 2025: chiropractic adjustment, imaging, massage therapy, pain management	5	$2,275.10

Treatment summary

Patient presented following a collisoin sustained while making a left turn, with a reported wrist fracture. The mechanism and force described are consistent with the injury observed on imaging and clinical assessment. Over the cousre of fifteen visits, treatment extended somewhat beyond what is typical for this type of fracture, reflecting a gradual recovery course with intemrittent follow-up. Examination findings include localized tenderness and reduced grip strength that support the reported injury, while several other neurovascular and range-of-motion tests returned within normal limits. No prior injury to the same wrist or forearm is documented in the available history. Billing for two similar treatment charges dated the same day is currently under review to confirm they reflect separate, medically necessary services. Ongoing monitoring and a structured rehabilitation plan are recommended, with reassessment at the next scheduled visit.
