Treatment History and Summary

Patient:	Ashley Smith
Treating provider:	Monique Mejia, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
September 2024: evaluation	1	$364.50
October 2024: imaging, massage therapy, physical therapy	5	$2,386.61
November 2024: imaging, massage therapy	3	$1,775.94

Treatment summary

Patient presented following a collision sustained while turning left, with the mechanism of injury consistent with the reported crash. Imaging and examination findings clearly confirm a fracture of the wrist. No prior injury to the same body area is known from the history obtained. Care was delivered over nine visits and followed a standard course, with immobilization, pain management, and progressive range-of-motion exercises. Visit frequency tapered as the patient's symptoms and function improved. Billing records reflect single, non-duplicated charges for each service rendered. The patient was discharged to self-directed home exercise with instructions to return if symptoms recur or worsen. Follow-up recommendations include continued monitoring of grip strength and wrist mobility until full recovery is documented.
