Treatment History and Summary

Patient:	Justin Anderson
Treating provider:	Christopher Walton, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
August 2023: evaluation, imaging, pain management	3	$1,671.30
September 2023: chiropractic adjustment, imaging, physical therapy	4	$867.83
October 2023: chiropractic adjustment, pain management, physical therapy	5	$1,634.81
November 2023: imaging	2	$2,136.41

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of right shoulder pain and restricted range of motion. The reported mechanism of injury is consistent with the forces involved in a collision of this type, and the presenting symptoms are plausible given that history. Over the course of 14 visits, care included physical examination, a structured rehabilitation program, and activity modification. Treatment followed a typical clinical progression, with visit frequency decreasing as strength and mobility improved. Imaging and clinical examination findings clearly confirm the shoulder injury. No prior injury or treatment involving the same body area is konwn to this provider. Administrative review of two similar billing entries recorded on the same date of service is currently in progress. Based on the patient's response to care, the provider anticipates continued gradual recovery with a home exercise program and periodic reassessment as needed.
