### Officer's narrative

On the reported date, I responded to a sideswipe collision on a roadway in League City, Texas. Driver 1 told me they were changing lanes when the vehicle on their right, operated by Driver 2, moved into the same space and made contact aolng the driver's side. Driver 2 gave a statement that matched this account in its sequence and location. Two independent witnesses at the scene described the same lane change and impact, and photographs taken at the scene show damage to the driver's side panels that is consistent with a glancing strike of this kind. No prior damage to Driver 1's vehicle was noted by anyone present or in my review. Passenger was seated in the vehicle at the time, and both the witnesses and I observed Passenger in the vehicle after the collision. Driver 1 reported pain in the shoulder, which EMS personnel assessed at the scene and which fits the direction and force of the impact. Driver 1 is listed as an insured driver on the policy for the vehicle involved. Both vehicles were drivable from the scene, and no citations were issued.
