Treatment History and Summary

Patient:	Kristina Brown
Treating provider:	Joseph Bradford, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
August 2023: chiropractic adjustment, evaluation, imaging, massage therapy, pain management, physical therapy	10	$3,444.92
September 2023: chiropractic adjustment, imaging, massage therapy, pain management, physical therapy	9	$3,435.52
October 2023: imaging	1	$932.55

Treatment summary

The patient presented following a low-speed head-on motor vehicle collision with complaints of neck and low back pain, muscle tightness, and restricted range of motion. The reported mechanism of injury is consistent with the kind and force of the impact, and the presenting symptoms fit that mechanism well. Physical examination documented reduced cervical and lumbar mobility with palpable paraspinal muscle tenderness, and imaging findings clearly confirm the soft tissue injury described. No prior injury or treatment to the same body regions is known from the history obtained. Over twenty visits, care consisted of manual therapy, guided exercise, and home program instruction, following a usual and expected course. Symptoms improved steadily, and visit frequency was reduced as function returned. Billing records reflect single, non-duplicated charges for each service rendered. At discharge, the patient was improving, with residual stiffness expected to resolve with continued home exercise.
