Officer's narrative

Driver 1 was traveling in the left lane on a Conroe, Texas roadway when Driver 1 attempted to move into the right lane and made contact with the side of Driver 2's vehicle, producing a sideswipe collision. Driver 2 confirmed the sequence of events at the scene, and two independent witnesses gave statements consistent with that account. Scene photographs show scraping and deformation along the right rear quarter panel of Driver 2's vehicle and the left front area of Driver 1's vehicle, which fits the angle and force of the impact described by all parties. Driver 1 identified the owner of the vehicle as the policyholder and stated that the driver resides in the same household. Passenger reported a knee injury and said Passenger was seated in the front right position at the time of impact. Both witnesses and the responding officer stated that Passenger was not inside the vehicle when the collision occurred, and no one at the scene could acocunt for Passenger's whereabouts at that moment. No prior damage to either vehicle was observed or reported. Passenger was evaluated by emergency medical personnel on scnee and transported for further examination.
