Treatment History and Summary

Patient:	Laurie Johnson
Treating provider:	Thomas Hall, DC
Diagnosis:	neck strain

Treatment history by month

Month and services	Visits	Charges
March 2025: evaluation, imaging, pain management	3	$1,409.45
April 2025: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$1,471.47
May 2025: chiropractic adjustment, imaging, massage therapy	4	$1,273.35
June 2025: imaging, massage therapy, pain management, physical therapy	5	$1,934.90
July 2025: imaging	1	$401.02

Treatment summary

Patient presented following a side-impact collision at an intersection with complaints of neck pain and stiffness. Imaging was not required at initial evaluation. Over the course of 18 visits, care consisted of manual therapy, targeted stretching, and a home exercise program. The mechanism of injury and the forces involved are consistent with the cervical strain diagnosed. Range of motion was reduced on initial examination, and palpable paraspinal muscle tenderness was documented, while neurological screening and strength testing remained within normal limits throughout. Reoprted symptoms followed an expected recovery pattern, with visit frequency decreasing as pain and mobility improved. No prior complaints or treatment involving the cervical region are known to this provider. Billing records reflect single charges for each service rendered, with no duplicate or repeated billing identified. Prognosis is good with continued self-directed exercise, and discharge from active care is anticipated.
