Officer's narrative

Driver 1 was traveling northbound through the intersection in League City, Texas, when the vehicle was struck on the driver's side by Driver 2, whose vehicle was southbound and entered the intersection against a steady signal. The impact was a side-on collision with significant force directed at the driver's door and rear quarter panel, and the damage visible on both vehicles is consistent with the reported mechanics of the crash. Driver 1 was seated in the vehicle at the time of impact and was assisted from the scene after reporting neck pain and stiffness. Passenger, who was seated in the front passenger seat, was also present, and both the responding officers and the statements gathered on scene cnofirm that Passenger was in the vehicle. Driver 1 described symptoms that fit the force of the collision, and the injury report is consistent with that account. Photographs taken at the scene confirm several details of the vehicle positions and damage, but no independent witnesses were located who saw the collision itself. Records checked during the investigation show no prior damage to Driver 1's vehicle, and Driver 1 is listed as a named driver on the applicable policy. No citations were issued at the scene pending further review of the signal timing.
