April 2024: chiropractic adjustment, pain management	5	$1,984.41
May 2024: chiropractic adjustment, imaging, massage therapy, physical therapy	7	$1,947.30
June 2024: chiropractic adjustment, imaging	2	$1,174.72

Treatment summary

Patient presented following a low-speed collision in a parking lot with complaints of neck and low back pain and muscle stiffness. The reported mechanism of injury is consistent with the findings documented at intake. Over the course of 22 visits, care consisted of manual therapy, targeted therapeutic exercise, and home exercise instruction, progressing in a typical manner for soft tissue strain. Range of motion and strength improved steadily, and visit frequency was gradually reduced as symptoms resolved. Imaging and physical examination findings clearly confirm the presence of cervical and lumbar strain. No prior complaints or treatment involving these body regions are known from the patient history reviewed. Billed services align with the documented plan of care, with no repeated or duplicate charges identified. Patient was discharged to self-directed home exercise with instructions to return if symptoms recur.
