Claim Notes

Claim number:	C-1067
Claimant:	Justin Mitchell
Adjuster:	Valerie Rodriguez

2023-04-23

The claimant reported a sideswipe while changing lanes and descrbied a sharp neck jolt along with immediate stiffness. Photos taken at the scene show damage consistent with the described impact, and the vehicle's damage pattern matches the account given.

2023-04-28

A review of the policy confirms the driver is named on it and that coverage was in force at the time of the loss. Nothing in the file suggests the vehicle was damaged before coverage began, and no earlier damage to the vehicle is known.

2023-05-18

The police report and statements from the scene confirm the claimant was in the vehicle at the time. No independent witnesses have come forward, so the scene photos are the main independent record of the event.

2023-06-17

The claimant was contacted by phone and gave the same account of the collision as in the initial report. Details of the lane change and the point of contact did not shift between conversations.

2023-07-07

Medical records show whiplash diagnosed shortly after the collision, which fits the kind and force of the crash. No earlier injury to the same area of the neck or upper back is known from the claimant's history or prior claims search.

2023-08-04

Treatment followed a typical course of physiotherapy and medication, and the reported symptoms eased steadily as the patient improved. Records from the most recent visit show the treatment has tapered off.

2023-09-19

Based on the photos, the damage, the police confirmation, the consistent account, and the medical course, the file spuports the claim as presented. Next step is to finalize the injury settlement review with the treating provider's fnial report.

Recorded Statement

Claim number:	C-1067
Statement of:	Justin Mitchell
Taken by:	Valerie Rodriguez
Date:	2023-02-19

Q: This is the adjuster following up on the claim you reported. Is it all right if I record this statement?

A: Yes, that's fine.

Q: Please state where you were when the collision happened.

A: I was driving in Katy, Texas, on a multi-lane road heading toward the freeway. I was moving from the center lane over to the right lane because I needed to exit.

Q: What did you see before you changed lanes?

A: I checked my mirror and I didn't see anyone right beside me. I put on my signal and started to move over slowly. About halfway into the lane change, I felt a bump on my passenger side and heard metal scraping.

Q: Did you see the other vehicle at any point before the contact?

A: Not until it was already alongside me. It came out of what I think was a blind spot, toward the back of my car. I didn't have time to react.

Q: Did either vehicle leave the roadway or strike anything else?

A: No. Both cars pulled over onto the shoulder after it happened. Nobody went into the ditch or hit a pole.

Q: How are you feeling since the collision?

A: My neck is really stiff and sore, and the pain runs up into the back of my head. I've had headaches most days. When I first got out of the car I felt okay, but by the next morning it was much worse.

Q: Have you soguht medical treatment?

A: Yes, I was seen at an urgent care clinic and I've been referred to a physical therapist. I'm still going to appointments.

Q: Is there anything else you'd like to add to your statement?

A: Only that I want my car fixed and I want to be able to work without pain. That's all I have for now.

Q: Thank you. This concludes the recorded statement.
