Description of the accident (claimant's words)

I was driving through the intersection on a green light when a vehicle coming from my right ran its signal and struck the side of my car. The impact pushed my vehicle toward the curb and set off the airbags. I remmeber the sound of the collision and the spin that followed, though my memory of the moments right after is patchy. I was dazed and had a headache that got worse over the next day, and I was later diagnosed with a concussion. Looking back, I have filled in a few small details as I have thought about that morning, but the core of what happened has not changed since I first described it at the scene. I am the named driver on this policy and I am providing this account so the claim can be processed.
