Treatment History and Summary

Patient:	Jose Shields
Treating provider:	Laura Bennett, DC
Diagnosis:	knee injury

Treatment history by month

Month and services	Visits	Charges
January 2024: evaluation, massage therapy	2	$352.17
February 2024: chiropractic adjustment, physical therapy	5	$721.46
March 2024: imaging, massage therapy, pain management	3	$1,420.53

Treatment summary

The patient presented following a low-speed head-on collision with a complaint of right knee pain and swelling. The reported mechanism of injury is consistent with the degree of force involved in the crash, and the presenting symptoms align well with that history. Physical examination revealed localized tenderness and a palpable effusion, while several ligametnous stability tests returned within normal limits. No prior injury to the same knee is documented in the patient's history. Conservative management was provided over ten visits, consisting of physical therapy, activity modification, and anti-inflammatory medication. Recovery has been somewhat slower than typically expected for this type of injury, though steady progress has been noted at each follow-up. Billing records reflect single charges for each service rendered, with no duplicate or repeated entries. Continued monitoring and a home exercise program are recommended, with reassessment planned if symptoms persist.
