## Treatment History and Summary

| | |
|---|---|
| **Patient:** | Michael Castaneda |
| **Treating provider:** | Kelsey Daniels, DC |
| **Diagnosis:** | shoulder injury |

### Treatment history by month

| Month and services | Visits | Charges |
|---|---|---|
| May 2023: evaluation, massage therapy, pain management | 3 | $1,071.11 |
| June 2023: massage therapy, physical therapy | 4 | $571.69 |
| July 2023: chiropractic adjustment, imaging, pain management | 5 | $2,283.78 |
| August 2023: chiropractic adjustment, imaging, massage therapy, pain management | 7 | $2,412.43 |

### Treatment summary

Patient presented following a rear-end motor vehicle collision with right shoulder pain and restricted range of motion. The reported mechanism of injury is consistent with the force of the collision and with the pattern of symptoms described. Over the course of 19 visits, care proceeded along a typical trajectory, beginning with assessment and physical therapy, followed by a home exercise program. Frequency of visits decreased steadily as pain and function improved. Examination revealed limited abduction and a positive impingement sign, while strength testing and neurovascluar findings were within normal limits. No prior injury or treatment involving this shoulder is known to this provider. Billed services correspond to the documented visits, with no duplicate or repeated charges identified. Patient was discharged to self-directed exercise with instructions to return if symptoms recur.
