Treatment history by month

Month and services	Visits	Charges
April 2024: evaluation	1	$250.20
May 2024: imaging, massage therapy	2	$686.66

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of right knee pain and swelling. Over three office visits, the patient was evaluated and managed conservatively. Causation of the knee complaints relative to this collision remains unclear at this time, and further correlation with mechanism and imaging history is recommended. Examination revealed some findings consistent with a soft tissue or ligamentous injury, including localized tenderness and limited flexion, while other orthopedic tests and neurovascular checks were within normal limits. No prior injury to the same knee is known to this provider. Recovery has taken somewhat longer than typically expected for this type of presentation, and ongoing physical therapy and activity modification have been recommended. Billing records show two similar charges posted on the same service day, which are currently being reviewed for accuracy. Follow-up will be scheduled to reassess symptoms and functional progress.
