Treating provider:	Kelsey Daniels, DC
Diagnosis:	wrist fracture

Treatment history by month

Month and services	Visits	Charges
May 2025: evaluation, pain management, physical therapy	3	$904.78
June 2025: chiropractic adjustment, pain management	4	$1,490.23
July 2025: imaging, massage therapy	2	$1,125.16

Treatment summary

Patient presented following a motor vehicle collision in which the patient's vehicle was struck on the driver side while turning left. The patient reported an outstretched-hand fall with immediate pain and swelling of the left wrist. Imaging confirmed a distal radius fracture, and the examination findings were consistent with that diagnosis. The mechanism and force of the impact are well matched to this type of injury. No prior injury to the same area is known from the history obtained. Care consisted of immobilization, pain management, and a graduated course of hand therapy over nine visits. Symptoms and range of motion improved steadily, and visit frequency tapered as healing progressed. Billing records reflect single charges for each service with no repeated entries. Patient was discharged from active treatment with a plan for follow-up as needed.
