Claim Notes

Claim number:	C-1076
Claimant:	Joseph Johnson
Adjuster:	Jerry Hanson

11-23-23
Claimant reported a low-speed head-on collision and a neck strain. The claimant is not represented by an attorney and has been asked to provide any medical records directly.

11-25-23
Police report and two independent witnesses confirm the claimant was in the vehicle at the time of the collision. The other driver's account matches the claimant's description of how the accident happened, and scene photos are consistent with it.

12-10-23
The neck strain is a plausible injury for a crash of this type. Initial treatment was conservative, consistent with the reported symptoms.

12-21-23
Claimant's medical history shows a small strain in the same area years ago, which healed fully with no ongoing complaints at the time. Records from that episode are being requested for comparison.

12-26-23
Treatment has grown to many times the usual amount for this injury, with near-daily visits. New body areas were added to the claim several weeks after the crash, and it is not yet clear whether all of the reported damage came from this impact.

5-2-24
Claimant has since added small details to the account, but the core description of the collision has stayed the same across each statement. No earlier damage to the vehicle is known, and nothing in the file suggests damage predates the policy start date.

5-19-24
The driver is named on the policy. Pending receipt of the requested meidcal records and an independent medical review, the file will remain open for evaluation of the treatment scope and its relationship to the collision.

Recorded Statement

Claim number:	C-1076
Statement of:	Joseph Johnson
Taken by:	Jerry Hanson
Date:	10-18-23

Q: Thanks for taking the time to speak with me today. This call is being recorded for claim purposes. Can you please state your full name for the record?

A: Sure. I'd rather not put my full name on it, so just call me the claimant.

Q: That's fine. Can you describe where the accident happened?

A: It was on a two-lane road in Conroe, Texas, near a shopping center. I was heading toward the intersection when the other car came into my lane.

Q: How fast were you traveling when the vheicles made contact?

A: Not fast at all. I'd guess maybe fifteen or twenty miles an hour. I was slowing down for traffic, and the other driver seemed to be drifting over.

Q: Were there any airbags deployed in your vehicle?

A: No, nothing deployed. Both cars were drivable, and we pulled over to the shoulder.

Q: Did you seek medical attention after the collision?

A: Yes, I went to urgent care the same afternoon. My neck was sore and stiff, and I had a headache that got worse overnight.

Q: What did the provider tell you?

A: They said I had a neck strain and gave me muscle relaxers and some instructions for stretching. They also recommended I follow up with my own doctor.

Q: Have you had any piror neck problems or injuries to that area?

A: Nothing serious. I had a little stiffness now and then from sitting at a desk, but nothing that stopped me from working.

Q: Are you still experiencing symptoms today?

A: Some days are better than others. Turning my head to the left is the hardest part, and I still get tired of sitting in one position for long.

Q: Thank you. Is there anything else you'd like to add?

A: Only that I want to cooperate fully and get this resolved. I appreciate your patience.

Q: Thank you for your time today. We'll be in touch with next steps.
