Description of the accident (claimant's words)

I was backing out of a parking space at a shopping center in Sugar Land, Texas, moving slowly with my headlights on, when the other vehicle came around the end of the row and struck the rear passenger side of my car. I stopped immediately, got out, and exchanged information with the other driver before anyone left the lot. My neck snapped forward and back on impact, and by the next morning I had stiffenss and pain that made turning my head difficult. I have been seeing a doctor for whiplash since then. When I have been asked to recall the collision since, I have added a few minor details, such as the exact position of the other car's mirror and the sound of the impact, but the core sequence of events has not changed from what I first reported. I am the named driver on this policy and I was operating my own vehicle at the time.
