Treatment History and Summary

Patient:	Laura Hansen
Treating provider:	Michael Clark, DC
Diagnosis:	back strain

Treatment history by month

Month and services	Visits	Charges
January 2025: evaluation	1	$262.40
February 2025: imaging, physical therapy	4	$1,206.82
March 2025: chiropractic adjustment, imaging, massage therapy, physical therapy	5	$2,532.66
April 2025: massage therapy	1	$92.68

Treatment summary

The patient presented atfer a sideswipe collision during a lane change and reported low back pain with muscle tightness and limited range of motion. The mechanism of injury is consistent with the reported pain, and the presentation is plausible for a crash of this type. Imaging and physical examination findings clearly confirm a lumbar strain. No prior injury to the lower back is known from the history provided. Care consisted of eleven visits, includnig manual therapy, graded therapeutic exercise, and home program instruction. Treatment followed a typical course, with visit frequency decreasing as pain and mobility improved. At the most recent visit the patient reported near-resolution of symptoms and had regained functional range. Two similar charges recorded on the same day are currently under review for accuracy. Discharge from active care is anticipated, with a return precaution given should symptoms recur or new neurological signs develop.
