| April 2025: chiropractic adjustment, massage therapy, pain management, physical therapy | 4 | $965.17 |
| May 2025: chiropractic adjustment, pain management | 2 | $737.32 |

### Treatment summary

The patient presented following a low-speed head-on motor vehicle collision with complaints of neck and low back pain. The mechanism of injury is consistent with the reported symptoms, and the force involved is in keeping with a cervical and lumbar strain. Over the course of care the patient attended 33 visits, with near-daily attendance for much of that period. Several additional body regions were added to the treatment plan a number of weeks after the collision. Cervical and lumbar imaging was unremarkable, and orthopeidc and neurological examinations were within normal limits. Nearly all of the reported findings rest on the patient's own description of pain and function. No prior injury to the cervical or lumbar spine is documented in available records. Billing reviewed for this episode shows no duplicate or repeated charges for the same services. Recommendations include a graduated return to usual activities, a home exercise program, and reassessment of the treatment frequency at the next scheduled review.
