Treatment History and Summary

Patient:	James Castillo
Treating provider:	Monique Mejia, DC
Diagnosis:	neck and back strain

Treatment history by month

Month and services	Visits	Charges
January 2023: chiropractic adjustment, evaluation	3	$468.27
February 2023: imaging, massage therapy, physical therapy	5	$2,261.20
March 2023: pain management, physical therapy	3	$1,060.40

Treatment summary

Patient presented following a rear-end motor vehicle collision with complaints of neck and low back pain, muscle stiffness, and reduced range of motion. The injury mechanism is consistent with the reported collision, and the presenting symptoms are plausible for this type of impact. Over the course of eleven visits, care followed a conventional progression that included evaluation, manual therapy, therapeutic exercise, and home stretching instructions. Imaging and physical examination findings clearly confirm soft tissue strain of the cervical and lumbar regions. No prior injury to these body areas is known to the provider or documented in available records. Treatment frequency tapered as the patient's pain and mobility improved, and the patient was discharged to an independent home exercise program. Billing for services reflects single, non-duplicated charges for each visit and procedure.
