Claim Notes

Claim number:	C-1092
Claimant:	Paige Wiggins
Adjuster:	Alison Sweeney

2-28-24
First notice of loss received from the claimant describing a rear-end collision at a low-speed intersection. The claimant reports neck pain and stiffness that began shortly after the impact and asked that the claim be opened for bodily injury and vehicle damage.

3-24-24
Confirmed that the driver is named on the policy and that coverage was active on the reported date of loss. No issues with the policy status were found at this stage.

3-26-24
Reviewed photographs submitted by the claimant showing the rear bumper and tail lamp area of the vehicle. The images confirm some of the damage described, though no independent witnesses have come forward to describe the collision.

5-2-24
Spoke with the claimant about the sequence of events. The account was consistent with the first notice and the claimant repeated the same description of the impact. The claimant could not confirm exactly where in the vehicle they were seated at the moment of impact, so this point remains open.

6-4-24
Requested prior vehicle and medical records. No earlier damage to the vehicle is on file, and no prior injury to the neck or upper back has been identified so far. The reported injury is consistent in type and force with a collision of this kind.

6-7-24
Reviewed the initial medical report. Treatment began with a few visits, but additional services have been added in each month since, and the frequency and scope now exceed what is typical for this kind of injury. The damage estimate has not yet been reconciled with the impact, and it is not yet clear whether all of the damage resulted from this collision.

6-19-24
Sent a request to the treating provider for itemized treatment notes and the clinical reasoning behind the added services. A follow-up call with the claimant confirmed the same account of the collision and of the symptoms, with no new facts introduced.

6-28-24
File remains open pending the provider response and an independent review of the vehicle damage. Nothing so far suggests the damage predates the policy start date, but the scope of the medical treatment and the extent of the vehicle damage still need to be resolved before a settleemnt position is set.

Recorded Statement

Claim number:	C-1092
Statement of:	Paige Wiggins
Taken by:	Alison Sweeney
Date:	1-5-24

Q: Thank you for taking the time to speak with me today. This recording is for claim review purposes. Can you please state your full name for the record?

A: Yes, I'm the claimant. You have my name on file already, so I'll just say I'm the driver of the vehicle that was rear-ended.

Q: Understood. Can you walk me through what happened at the time of the collision?

A: I was stopped at a light on a main road in Pearland, Texas, waiting for the signal to change. I had come to a complete stop when I felt a hard impact from behind. My head snapped back and then forward, and my seatbelt locked up.

Q: Did you see the other vehicle before the impact?

A: Not really. I checked my mirror a moment before, but the car behind me was a bit further back. I didn't have time to react after that.

Q: Were you able to get out of your vheicle at the scene?

A: Yes, I got out, but I felt dizzy and stiff. The other driver was apologetic and we exchanged information. A police officer came out and filed a report.

Q: Have you sought medical treatment since the collision?

A: Yes, I went to an urgent care clinic that same day and was later referred to a physical therapist. I have neck pain that radiates into my shoulders, and I get headaches, mostly in the afternoon. Turning my head to check blind spots is painful.

Q: Are you still experiencing those symptoms now?

A: Yes, they're improving slowly, but I still have stiffness in the morning and I've had to cut back on driving longer distances.

Q: Thank you. Is there anything else you'd like to add to your statement?

A: No, I think that covers it. I'm willing to provide my medical records and the report number from the officer.

Q: Thank you for your cooperation. This concludes the recorded statement.
