Reported injury:	wrist fracture

Description of the accident (claimant's words)

I was maikng a left turn at an intersection in Pearland, Texas, waiting for a gap in oncoming traffic, when another vehicle struck the rear quarter of my car. I had my signal on and was nearly stopped when the impact came. The force threw me against the steering wheel and I caught my left arm on the door frame. At the scene I was in pain and my wrist was swelling, and I was taken to the emergency department, where I was told the wrist was fractured. I have described the events the same way each time I have spoken about them, whether to the other driver, the responding officer, or medical staff. I am the household member of the policyholder and live at the same address, and I was driving the insured vehicle with permission. I am submitting this accuont so my injury and the damage to the vehicle can be assessed.
