Patient:	Jasmin Kelly
Treating provider:	John Silva, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
June 2025: chiropractic adjustment, evaluation	3	$573.57
July 2025: chiropractic adjustment, imaging, massage therapy, pain management, physical therapy	6	$1,540.90

Treatment summary

Patient presented following a low-speed head-on motor vehicle collision with complaints of right shoulder pain and restricted range of motion. The reported mechanism of injury is consistent with the kind and force of the crash. Examination findings and imaging clearly confirm the shoulder injury. The patient has a remote history of a minor strain in the same area, which resolved completely without residual limitation and does not account for the current presentation. Care was delivered over nine visits and followed a typical course, consisting of physical therapy, a home exercise program, and anti-inflammatory medication as needed. Symptoms and function improved steadily, and visit frequency was tapered accordingly as the patient progressed. Billing records reflect no repeated or duplicate charges for the same services. At the most recent evaluation, the patient reported near-resolution of pain with mild residual stiffness on overhead reaching. Plan is to continue the home exercise program and reassess as needed.
