Treatment History and Summary

Patient:	Sarah Foster
Treating provider:	Morgan Lewis, DC
Diagnosis:	shoulder injury

Treatment history by month

Month and services	Visits	Charges
April 2023: evaluation	1	$348.25
May 2023: imaging, pain management, physical therapy	5	$2,456.94
June 2023: imaging, massage therapy, physical therapy	3	$761.35
July 2023: imaging, massage therapy, pain management	5	$1,170.39

Treatment summary

Patient presented following a rear-end motor vehicle collision with ongoing right shoulder pain and reduced range of motion. The reported mechanism of injury is consistent with the force and direction of the collision. Over the course of fourteen visits, treatment included physical therapy, graded range-of-motion exercises, and home exercise instruction. Treatment continued somewhat longer than is typical for this presentation, with progress tracked at each visit. Examination revealed positive findings in the supraspinatus and impingement testing, supporting a soft tissue injury to the shoulder, while several other orthopedic and neurological tests returned normal results. No prior injury or treatment to the same shoulder is known to this provider. Billing records reviewed for this episode of care show no duplicate or repeated charges for the same services. Current status is improved strength and motion, with continued home exercise and reassessment planned if symptoms persist.
