Treatment History and Summary

Patient:	Samuel Murphy
Treating provider:	Christopher Walton, DC
Diagnosis:	neck strain

Treatment history by month

Month and services	Visits	Charges
December 2024: chiropractic adjustment, evaluation, imaging, massage therapy, pain management	11	$4,139.44
January 2025: chiropractic adjustment, massage therapy, pain management, physical therapy	8	$1,646.29

Treatment summary

Patient presented following a motor vehicle collision in which the patient's vehicle was struck while turning left. The patient reported immediate onset of neck pain and stiffness, and the mechanism of injury is consistent with the reported symptoms. Over the course of 19 visits, care consisted of conservative management including manual therapy, stretching and strengthening exercises, and home exercise instruction. The treatment course followed a typical progression, with visit frequency decreasing as the patient's range of motion and pain levels improved. Imaging and physical examination findings clearly confirm a cervical strain consistent with the collision. No prior injury or treatment to the cervical spine has been reported or identified in the records reviewed. Billing records reflect single charges for each service rendered, with no duplicate or repeated billing observed. The patient was discharged from active care in stable condition with instructions to continue the home exercise program as needed.
